

Internal Drainage Boards

Goole & Airmyn IDB

A & F Consulting Engineers are working for several Internal Drainage Boards in the Yorkshire area. We offer expert drainage advice, with solutions and assistance on capital grant applications. A&F Consulting Engineers are acting as Chief Executives from 2008 for the newly formed Lower Aire & Don Drainage Consortium.

Farms, Residential Developments and Estates

Credit Environment Agency

Some farming and residential communities are vulnerable to inundation; we can offer cost effective and rapid solutions.

Local Authority and Highway Projects

In-house development experience includes schools, community centres and transport links. We advise in the site selection process and emergency planning.

Environmental

All our land drainage projects are designed to incorporate and develop environmental and sustainability issues.

Drainage experience varies from protecting endangered species, flood risk assessments, estuary foreshore protection, SSSIs and other environmental sites.

Private Drainage, Industrial and Business Concerns

A & F are able to supply comprehensive services, from surveying through design and consultation, to site supervision and implementation. No project is too large or too small. We are currently working on the M62 Junction 36 development in the UK.

Drainage experience varies from airfields, golf courses, marinas and industrial estates.

Expert Witness

A & F Consulting Engineers have worked on behalf of private clients as expert witnesses in land drainage and flooding issues.

Flooding ignores boundaries
