

## Scientific Research

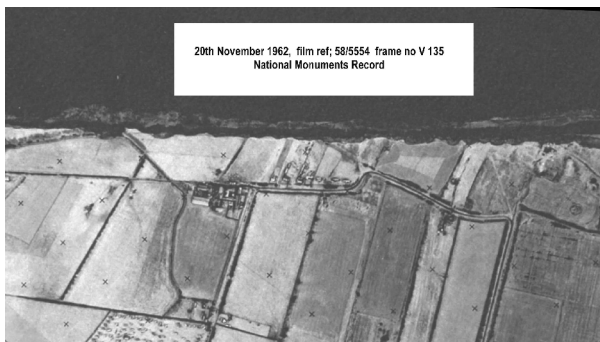

*Surveying and monitoring the East Coast*

Scientific research is applied directly to on site applications. A & F carefully record the results in order to produce a comprehensive and reliable database, whereby statistical (or other) analysis can contribute to successful management decisions.

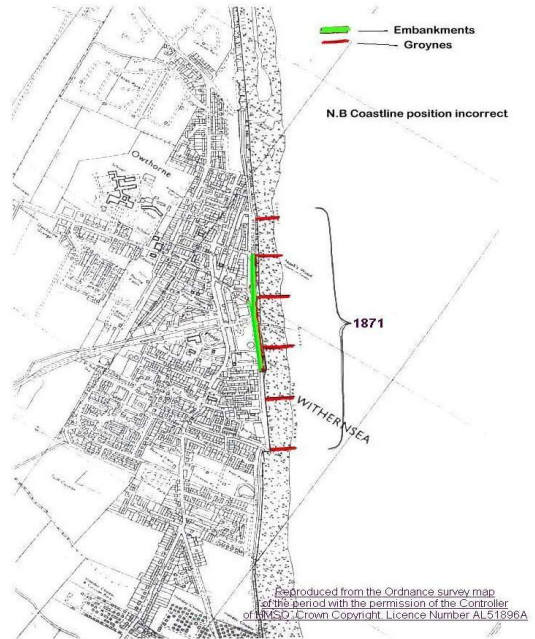

*Recycled Waste Tyres*

## Historic Research

Historic Research can reveal enormous quantities of data. Careful quality management and actuary recording enable A&F to present a comprehensive chronology of events on a particular site.

## 1871 WITHERNSEA

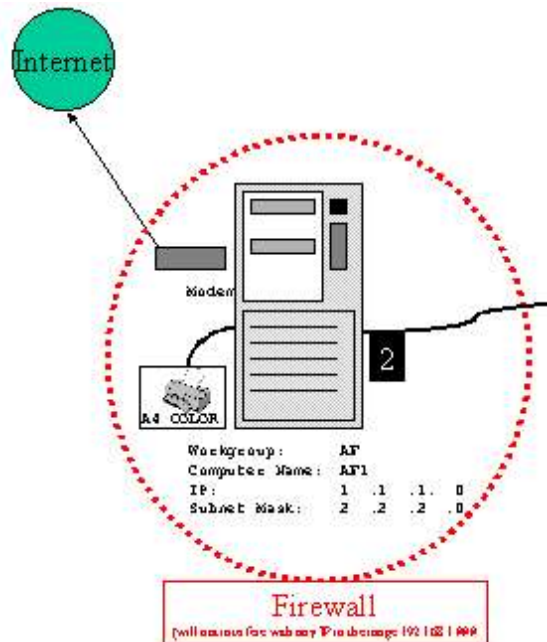

A & F is able to tailor presentation methods to client preferences.

## Other Research

Research into other areas can also generate discoveries, which provide useful information.

Internet searches offer a cross referencing method and may be cheaper than more conventional research methods. However, one must remember that the internet is not always accurate.

*Telemetry & Computer applications*
